

SKYKICK CLOUD BACKUP FOR OFFICE 365

Easy set up, unlimited
backup & one-click restore

WHAT IS SKYKICK?

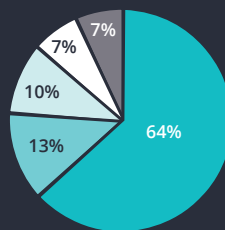

SkyKick Cloud Backup is a market-leading, cloud-to-cloud backup solution that helps protect Office 365 data. Featuring unlimited backup and retention, rapid search, and one-click restore that places data back into the same location, it's one of the fastest and easiest ways to get customer productivity back on track.

32%
OF COMPANIES
WILL EXPERIENCE
DATA LOSS
IN THE CLOUD

WHY BACK UP OFFICE 365 DATA?

File recovery without backup can take +6 hours per incident

- User Error
- Hackers
- Closing Account
- Malicious Deletion
- Third-Party Software

75% of content is lost via deliberate or accidental deletion

CUSTOMER PAIN POINT: Microsoft Office 365 only replicates your data for retention purposes and restoring files is a long and complicated process, plus there's no easy way to recover data in bulk.

SOLVE IT: Use SkyKick's powerful search indexing and one-click restore features to retrieve individual data or bulk data sets in minutes, not hours.

BY 2019 THE COST OF
DATA BREACHES
WILL BE MORE THAN
£1.6 TRILLION

- IT WEB, 2017

CUSTOMER PAIN POINT: An infection that affects the original file stored in OneDrive for Business (either via malware or malicious intent) can affect all synced file versions.

SOLVE IT: SkyKick will not overwrite the original file after a backup takes place, instead the solution stores it as a separate file to eliminate the risk of cross-file infection.

CUSTOMER PAIN POINT: SharePoint

Administrators and OneDrive for Business users can permanently delete data and there's no way easy way of restoring it.

SOLVE IT: SkyKick will back up all SharePoint sites and OneDrive for Business accounts across the whole organisation, instead of creating separate instances for users, meaning it's easier to roll back to a prior version earlier that day.

THE AVERAGE
PREDICTABLE COST OF
DATA LOSS TO A
SMALL BUSINESS IS
£3,936

- SKYKICK

CUSTOMER PAIN POINT: Deleted items in Exchange Online will be permanently removed after the 30-day retention period, while SharePoint and OneDrive for Business only have a 93-day retention period, with no archiving or expanded data protection options to recover lost data.

SOLVE IT: Experience unlimited backup and retention with SkyKick – there's no data cap and you can back up data up to six times a day.
